SUMMARY

Program Manager leading workflow automation, business intelligence, and supply-chain operational improvements across global services operations, with projects driving $75M+ in annual impact. Recognized for translating ambiguous business needs into scalable technical & analytics solutions, and delivering executive-ready insights through advanced data visualization & storytelling. Applies LLM-powered automation, AI-assisted coding and predictive modeling to enhance decision-making.

SKILLS

Project Management: Workflow automation, Cross-functional leadership, Stakeholder management, Product requirements (PRDs), Roadmap planning, Risk assessment, KPI design & tracking, Agile/Scrum, ROI analysis, Systems & Design thinking.
Data Analytics: Python, R, SQL, Tableau, Power BI, Azure, Databricks, advanced Microsoft Excel (Macros/VBA), Predictive & Prescriptive modeling, Statistical analysis, Dashboard development, Data storytelling.
Technical Tools & Automation: AI agent development, Power Automate, REST APIs, ETL pipelines, Git, Spark, Smartsheet.
Certifications: Lean Six Sigma, MOS Excel Expert, Intermediate SQL, NASBA Ethical Leadership.

PROFESSIONAL EXPERIENCE

Applied Materials Austin, TX
Program Manager Jun 2025 - Present

- Direct end-to-end design, prototyping, testing and launch of repair enablement programs across 600+ vendors, automating questionnaire distribution, tracking and escalation (Claude AI Agents, Power Automate, interactive dashboards) to drive 700+ part enablements and an estimated $60M in annual repair business, and save 630+ hours annually.
- Establish a part disposition workflow managing 900+ parts and $20M in annual part retention costs, incorporating automation, cost-impact modeling and scrap decision logic to cut turnaround time 50% and scrap risk errors.
- Lead the part repair solution recommendation process for 190+ customer-impacting inquiries. Facilitate weekly SME reviews (Smartsheet, Power Automate, Tableau, and Excel) to resolve exceptions or challenged cases.
- Design a part repairability & sourcing reclassification workflow, enabling Purchasing, Finance and Repair to process supplier-driven changes and reserve/financial impact, from requirement definition, leadership alignment to user training.
- Oversee development of 5 end-to-end operational workflows, 11+ dashboards serving 53+ users across 7 teams, and 10+ continuous improvement (CIP) initiatives targeting bottleneck elimination, modernization and process streamlining. Onboard and train a new team member on the tools and workflows.

Volvo Group Greensboro, NC
Data Analytics & Automation Intern Jan 2024 - May 2025

- Deployed predictive models (7% MAPE, 97% R2) for Volvo's used asset valuation, empowering Sales leaders to make data-driven resale and end-of-life decisions; built using Time-series Prophet & Extreme Trees, hosted via a Databricks API.
- Engineered an LLM-powered automation process (ChatGPT, Gemini via Azure OpenAI Service) for text summarization and sentiment analysis, streamlining global financial month-end reporting across 52 markets.
- Co-developed 2 Power Apps data management tools and renovated AML Power BI dashboards, improving real-time reporting of $9 billion portfolios and strengthening regulatory oversight across 11,000+ financial services transactions.

CDK Global Austin, TX
Software Engineer & Analytics Intern Jun - Dec 2023

- Diagnosed system-wide issue across 6,000 customers by analyzing configuration data to resolve cybersecurity failures during M&A transitions to elevate user experience with CDK's platforms and API services.
- Optimized API performance by generating usage insights and contributing to 4 REST APIs (Java Spring Boot & OpenAPI), facilitating precise data retrieval for 27,000 stakeholders across repair, inventory and accounting endpoints.

Trinity Neuroscience Lab San Antonio, TX
Data Science Student Researcher Sep 2022 - Dec 2023

- Analyzed large-scale biomedical datasets and built GPU-accelerated clustering pipelines for 178M+ antibody sequences with Python & R. Published 2 peer-reviewed papers and advanced immunotherapeutic research.

EDUCATION

Bachelor of Science: Business Analytics & Technology | Bachelor of Arts: Computer Science Aug 2021 - May 2025
Trinity University, San Antonio, TX **|** GPA: 3.98 | Concentration: Data Science

- Honors & Awards: Class Honors Scholarship; Beta Gamma Sigma Honor Society; Dell Honors Award; 3rd Place, National Business Analytics Competition (Manhattan College, 2023).
