SUMMARY

Project Manager leading high-impact workflow automation, business intelligence, and supply-chain operational improvements across global services operations. Translates ambiguous business needs into scalable technical and analytics solutions; delivers executive-ready insights through data visualization and storytelling. Uses LLM-powered automation, AI-assisted coding, and predictive modeling to improve decision-making.

SKILLS

Project Management: Workflow automation, cross-functional leadership, stakeholder management, PRDs, roadmap planning, risk assessment, KPI design & tracking, Agile/Scrum, ROI analysis, systems & design thinking.

Data Analytics: SQL, Tableau, Power BI, Azure, Databricks, advanced Excel (Macros/VBA), predictive & prescriptive modeling, statistical analysis, dashboard development, data storytelling.

Technical Tools & Automation: Python, R, Git, Spark, Smartsheet, Power Automate, REST APIs, ETL pipelines, AI agent development (built on Claude).

Certifications: MOS Excel Expert, Intermediate SQL, NASBA Ethical Leadership.

EXPERIENCE

Applied Materials

Jun 2025 – Present

Project Manager

Austin, TX

- Own end-to-end design, launch, and operation of a portfolio of repair-enablement programs, defining requirements, building automation, specifying dashboards, aligning cross-functional stakeholders, and training operators; launched 3 standardized programs in FY26 with a 4th in design, each handed off to a dedicated owner after stabilization.
- Launched a supplier capability qualification program to 43 engineering and sourcing stakeholders, now underpinning approximately \$70M of repair enablement annually.
- Built a cost-exposure model that identified \$2.6M in annualized hold-cost risk across 42 parts, added a cost-justification requirement to the intake process, and converted the one-time analysis into a recurring automated financial control with quarterly review.
- Directed a repair-inquiry intake and tracking workflow handling 190+ inquiries (113+ closed) and a stakeholder communication process reaching 220+ users.
- Own 9 dashboards end-to-end (Tableau, custom interactive HTML, and Smartsheet) used by 53+ users across 7 teams, plus delivered continuous-improvement updates to 5+ additional dashboards.
- Migrated a legacy automation workflow onto AI agents built on Claude, creating automated routines that generate escalation reporting, refresh dashboards, and draft recurring status updates, reducing manual reporting effort.

Volvo Group

Jan 2024 – May 2025

Data Analytics & Automation Intern

Greensboro, NC

- Deployed predictive models (7% MAPE, 97% R^2) for used-asset valuation using time-series Prophet and Extra Trees, served through the Databricks API.
- Built an LLM-powered automation process (ChatGPT/Gemini via Azure OpenAI) for month-end reporting summarization and sentiment analysis across 52 markets.
- Co-led 2 Power Apps tools and renovated AML Power BI dashboards covering \$9B portfolios and 11,000+ transactions.

CDK Global

Jun 2023 – Dec 2023

Software Engineer & Analytics Intern

Austin, TX

- Diagnosed a system-wide configuration issue across 6,000 customers during M&A transitions.
- Optimized API performance and contributed to 4 REST APIs (Java Spring Boot & OpenAPI) serving 27,000 stakeholders.

Trinity Neuroscience Lab

Sep 2022 – Dec 2023

Data Science Student Researcher

San Antonio, TX

- Built GPU-accelerated clustering pipelines for 178M+ antibody sequences (Python & R); published 2 peer-reviewed papers.

EDUCATION

Trinity University, San Antonio, TX

Aug 2021 – May 2025

BS Business Analytics & Technology (Data Science concentration) + BA Computer Science, GPA 3.98

- Class Honors Scholarship; Beta Gamma Sigma; Dell Honors Award; 3rd Place, National Business Analytics Competition (Manhattan College, 2023).
